

Individual Reflection Week 18

Tove Nilsson

06-05-22

What do I want to learn or understand better?

During this sprint we changed how we used to work. Instead of having one group only working on the backend, and one group only working on the frontend, we decided to work more vertical. The team members working on a user story will do both backend and frontend, which let the team work more efficient. Since I have only worked with the frontend I want to learn more about the backend part to be able to contribute. I will do this by looking at the documentation of the code and to ask the team.

How can I help someone else, or the entire team, to learn something new?

I and Olivia worked on the search bar, where we set up lucene and got to know how to use query/search in the event data. So I could help the team to understand what we have done.

What is my contribution towards the team's use of Scrum?

I participated in the sprint planning, where we discussed the goal for the week and wrote the sprints user stories. The team voted and discussed about the velocity and the cost. During the sprint I, together with the team, worked on the user stories. I also contributed during the meeting with the stakeholder, and the discussions for the sprint review and sprint retrospective where we reflected and evaluated the sprint and how to improve it for the next sprint.

What is my contribution towards the team's deliveries?

Just as last sprint, I contributed towards the team's deliveries by working on the user stories that we set up during the sprint planning. This was the first sprint where we actually finished all of the user stories, I think we have got a better understanding of how to set the velocity and the cost. I also contributed to the team reflection.
