

Individual Reflection Week 12

Julia Ekeblad

26-03-22

What do I want to learn or understand better?

I want to learn how to use and utilize Scrum to better work with a group project. Secondary to that I also want to learn more about developing a product and the process and steps.

How can I help someone else, or the entire team, to learn something new?

I have some programming experience in different languages.

What is my contribution towards the team's use of Scrum?

With Minetest I guess my contribution was that I did my best and was an active team member. We were all confused and stressed but we helped each other out as much as possible.

What is my contribution towards the team's deliveries?

This week we drew up the social contract. We did it together and I believe I contributed with some ideas. We all seemed to agree on all points and I am pleased with the final result.
