

# Individual Reflection Week 13

Kevin Zhao

01-04-22

## **What do I want to learn or understand better?**

As we have decided on our project, creating a new version of a website for Tickster, I want to learn lots about end-to-end development as I have little to no experience of it. The programs we are most likely going to use are React, JavaScript and C and I look very forward to learning it with my team to widen our knowledge within SE.

## **How can I help someone else, or the entire team, to learn something new?**

Since I am very unexperienced I believe that we will have to help each other as a team, finding relevant tools, articles and solutions to the problems we will face during the upcoming sprints. Hopefully I will be able to share some of my knowledge to my amazing team.

## **What is my contribution towards the team's use of Scrum?**

As we are still in the very early stages of the project, yet to start any sprints. I believe my contribution will be to visualise and conceptualise what themes, epics and user stories our sprints will have.

## **What is my contribution towards the team's deliveries?**

Together with my team we created and delivered the mockup, business model canvas as well as created our Definition of Done. I wouldn't say I have contributed any more or less than any other member of the team.
