

Individual Reflection Week 20

Julia Ekeblad

24-05-23

What do I want to learn or understand better?

I was sick again and didn't have the energy to do as much work as I had wanted, it also caused problems for the deliveries since there was a user story this week that I was sole responsible for. So we talked about what to do in such a situation and our social contract didn't really approach that so that is something I would like to do for next time.

How can I help someone else, or the entire team, to learn something new?

Now I know how to make a multi-page website so if anyone wants to learn about that I can definitely help out there.

What is my contribution towards the team's use of Scrum?

Not much, I didn't partake in many of the scrum activities. I was healthy and active at the planning meeting and made some user stories.

What is my contribution towards the team's deliveries?

I helped out a little bit during the week with the search results when a team member needed help. I finished my user story about a multi-page website in the weekend so it was technically after the sprint was over and I probably wouldn't have done that unless we had the presentation Monday right after.
