

Individual Reflection Week 19

Kevin Zhao

16-05-22

What do I want to learn or understand better?

Since I was the scrum master this sprint I tried to read more into the scrum methodology. I believe that there are still a lot more to understand that primarily needs experience. I learned a lot by discussion some aspects of scrum with Jean Philippe and our TA.

How can I help someone else, or the entire team, to learn something new?

I tried to share the knowledge that I have gained throughout the sprint and as well as different ways to categorise the events. Otherwise the same as always, to encourage communication in the team.

What is my contribution towards the team's use of Scrum?

As the scrum master I held in the daily scrums as well as lead the review + retrospective. This week we managed to do the review and retrospective incredibly efficiently and I am incredibly happy as the team seems to be very comfortable with Scrum now.

What is my contribution towards the team's deliveries?

My contribution this week was primarily user story 4.1 where I created 10 different categories. Although the code was improved by Ingrid, Martin and Elvina, I tried to start on the word stem search for the event categories.
