

Individual Reflection Week 20

Elvina Fahlgren

20-05-22

What do I want to learn or understand better?

This was our last sprint. I have learned a lot about scrum and more about working in a team. It has been very interesting and fun. However, I think there is still a lot to learn about scrum, which I hopefully can do by using scrum in larger projects.

How can I help someone else, or the entire team, to learn something new?

I have read a lot about how hooks works in TypeScript. For example, there is not possible to use hooks in for-loops. I shared this information to my team members so that they would not get the same problems as me.

What is my contribution towards the team's use of Scrum?

As in all other sprints, I have participated on all meetings. We also discussed with the stakeholder what we should be prioritizing the last days of the project. And then we had a closing meeting where we discussed the final product, and they seemed happy!

What is my contribution towards the team's deliveries?

During this sprint, I finished the tags, and made them responsive.
