

# Individual Reflection Week 20

Martin Toremark

2022-05-20

## **What do I want to learn or understand better?**

This was the last sprint of this project and we were able to deliver everything in time. It has been a very valuable and interesting course and I have learnt a lot about scrum and software development. However, the project was quite short so I would like to learn even more about scrum and software development in the future. I would especially want to learn more about the application of Scrum in more complex projects working with machine learning.

## **How can I help someone else, or the entire team, to learn something new?**

I have continued to share resources I have found in my own research that I thought was relevant to the other team members. This approach has worked really well during the project because it has enabled us as team members to learn more from each other.

## **What is my contribution towards the team's use of Scrum?**

I participated in all meetings - planning, review and daily stand-ups. I also participated in the two meetings with the stakeholder where we discussed prioritization of our work.

## **What is my contribution towards the team's deliveries?**

This sprint I focused on improving the categorization so the result we got was good enough. I also helped the other team members whenever it was needed.
