

Individual Reflection Week 12

Tove Nilsson

25-03-22

What do I want to learn or understand better?

During the first week, the concept of Scrum was introduced. This is a procedure that I have never worked with before. The two exercises, drawing and minetest, was a great opportunity to get a better understanding of the Scrum methodology. Throughout the course and the project I want to get fully comfortable with using Scrum and how to work with it. To accomplish this, I should repeat the lecture slides and do my own research on the parts I do not entirely understand yet together with learning by doing.

How can I help someone else, or the entire team, to learn something new?

I can hopefully contribute with my experience in programming and a positive mindset to learn new technologies. Since almost all the team members have different experiences, I think we can learn from each other.

What is my contribution towards the team's use of Scrum?

During the minetest exercise, I together with the team tried our best to understand and work with Scrum. We all contributed to choosing user stories that would match our velocity.

What is my contribution towards the team's deliveries?

My contribution to the team's deliveries has been the social contract. This was written together with the rest of the team. For the remaining weeks I want to contribute as much as I can. To achieve this, I will continue to attend meetings and participate in discussions.
