Individual Reflection Week 19

Tove Nilsson

13-05-22

What do I want to learn or understand better?

This week we had some problem with showing the search bar results. I have learned a lot about typescript and react but I can always learn more. To be able to solve the problem we have right now I want to learn how to display the results sent from the backend. I can learn this by researching, trying and discussing with the group.

How can I help someone else, or the entire team, to learn something new?

If I find anything use full during my research I can share and discuss with the team.

What is my contribution towards the team's use of Scrum?

I participated in the sprint planning, were we discussed the goal for the week and wrote the sprints user stories. The team voted and discussed about the velocity and the cost. During the sprint I, together with the team, worked on the user stories. I also contributed during the meeting with the stakeholder, and the discussions for the sprint review and sprint retrospective where we reflected and evaluated the sprint and how to improve it for the next sprint.

What is my contribution towards the team's deliveries?

Just as last sprint, I contributed towards the team´s deliveries by working on the user stories that we set up during the sprint planning. I was present on all the meetings and took part in the team discussions on how to solve the user stories. I also contributed to the team reflection.
