Individual Reflection Week 15 & 16

Julia Ekeblad

23-04-22

What do I want to learn or understand better?

Since we kind of started again this sprint I basically have the same goals as last week. Thus far I (and I think we all) have done a lot of learning-by-doing and "gör om, gör rätt" ((redo, do right?)). I am also learning a lot about my team members as well as from them and that is something that I would very much continue to do.

How can I help someone else, or the entire team, to learn something new?

We kind of all learn new things all the time since we're mostly starting from scratch so I like to share what helpful things I have discovered.

What is my contribution towards the team's use of Scrum?

I was present and active in all the basic scrum meetings, aka the sprint planning and the RRR(Review, Retrospective and Reflection)-meeting. We discussed how to use and improve our Scrum practises from last week and I think that we were all happy with the change.

What is my contribution towards the team's deliveries?

I worked on the user stories and we got familiar with the frontend and made a background sort of for the rest of the content to be placed in.
