# Individual Reflection Week 18

## Julia Ekeblad

### 8-05-22

**What do I want to learn or understand better?**

This week I have been sick almost the entire sprint but tried to work from home with the others as much as I felt that I could. We have learned so incredibly much so far but I still want to learn how to use Scrum better as well as React/Bootstrap. We wanted to implement a carousel for the event cards and that was a challenge, but I learned a lot.

**How can I help someone else, or the entire team, to learn something new?**

I feel that I know more about React/Bootstrap now and I can help someone with all the components we have used this far.

**What is my contribution towards the team's use of Scrum?**

I wasn't very active in the sprint planning due to illness but at the end of the week I was at the RRR-meeting that also had a little meeting with our stakeholder and I asked and answered questions and contributed to the RRR-documents as well.

**What is my contribution towards the team's deliveries?**

The carousel, it was a big challenge that we mastered in the end and it was a big part of the final product as well and it felt good to have a real working carousel that actually looked like we wanted it to.
